

## State CIO – Ramesh Thadani Summary of Aug 26, 2025 Annual meeting

- **Ramesh Thadani Introduction**
  - Ramesh Thadani is from the Rocklin / Roseville Branch 98. He has been with SIR over 10 years. He is an active member participating in various activities, including being WebMaster and is currently the newsletter editor for Branch 98 and the State CIO since May 2025.
- **Password change for State web site “sirinc.org” effective July 1, 2025**
  - The password change was reviewed. The new password was shared with attendees. One can obtain the password by contacting their Area Rep.
- **Branch Leadership data (Form 20/22) enhancement - Pilot testing**
  - The CIO team is pilot testing an improvement in the processing of the Form 20/22 data which updates the Branch Information and Leadership directory. Branches will have the capability to update their changes for 2026 directly in real time. We currently have 10 Branches participating in the pilot testing. Area Reps are requested to recommend additional Branches to participate in the pilot testing.
- **PC Windows 10 issue - Vulnerability to hacking - Oct 14, 2025**
  - Microsoft will no longer provide vulnerability updates to Windows 10 after October 14. If you have a PC, please update your PC to Windows 11 or evaluate acquiring a new PC. The CIO team will schedule a Zoom session to guide members and answer any questions that they have.
- **“AI Assistant” for State Policy Manual and State Leadership Guide**
  - State CIO is pilot testing an “AI Assistant” to query the State Policy Manual and State Leadership guide document. One will be able to get answers to their queries without having to search the entire document for their query manually.
